3430 Old Columbus Rd NW
Carroll, Ohio 43112
Minutes for April 10, 2017**

Meeting to order

Glenn Burns called the meeting to order at 6:00 p.m. with the Pledge of Allegiance. Board Members present at the meeting were Glenn Burns, Pat Ferguson, Jon Kochis, Michael Kaper, and Bill McNeer. Board members Rick Szabrak and Bill Fagan were absent. Also present were Greg Heaton and Pat Rooney.

Opportunity for the Public to Address the Board

No member of the public addressed the Board.

Approval of Minutes for the March 13, 2017 Meeting

On motion of Jon Kochis and second of Bill McNeer, the Fairfield County Airport Authority Board voted to approve the minutes from the March 13, 2017 meeting.

Discussion: Mr. McNeer stated that “sales” should be added to Mr. Loos comments for the Airport Manger update regarding fuel on the first page. He also asked that “censor” be corrected to “sensor” in the minutes.

Voting aye thereon: Kochis, McNeer, Burns, Kaper, and Ferguson. Motion passed.

Historical Aircraft Squadron (HAS) update

Mr. Ferguson reported that the next few months they are booked with events. The cub scouts will be here at the end of April. He would like to volunteer to be a representative of the Airport Board and attend their event and bring a fire ring to the event to have a bonfire.

Mr. Kochis recommended that Mr. Ferguson contact Greenfield Township Fire to let them know when the bonfire will occur.

Airport Manager Update

Mr. Rooney updated the Board on the status of moving the Airport to a Class E Airspace to the Surface. A radio communication continuous to the surface is required and the Airport has to have the right kind of weather reporting. The current monitoring of the weather reporting is not the right kind and there is no frequency communication on the approach. He does not think the switch to the Class E Airspace will be approved. He also reported that Steve Slater, the owner of Due North, the Helicopter Operation at the Airport could not do special Visual Flight Rules (VFR) if the Airport was switched to the Class E.

Mr. Rooney stated that there is no update on the Chart Supplement regarding the parachute writing.

Mr. Rooney presented Sundowner Aviation’s Monthly Board Report, see attached to minutes. He reported that Sundowner Aviation is down 35% in flying activity. The fuel sales are also down. There was a mild winter but had low clouds and ice that affected activity.

Mr. McNeer asked about how the drone activity affected their operations.

Fairfield County Airport Authority Board Meeting
3430 Old Columbus Rd NW
Carroll, Ohio 43112
Minutes for April 10, 2017

Mr. Rooney stated that most people are under the impression that drones have to have permission from the Airport. Commercial drones have to have permission but private owners actually do not. They have not experienced problems thus far.

Mr. Rooney stated that the FAA in the Standards Office is in favor of the Airport being a Class E. He believes that the Airport District Office is not in favor of the Airport switching to Class E. He talked with Mr. Slater who runs Due North Aviation to see what problems he would have with Class E. He said it would be more difficult with Special Visual flight rules (VFR). He uses VFR for weather conditions for permission to fly to the surface. Before switching to Class E, the Airport would have to have agreements with Approach Control.

Mr. Rooney reported that he received rules for the BasicMed certification. He asked if anyone is interested he will pass on the information.

RE: Pavement Inspection

Dear Airport Sponsor:

The Office of Aviation conducted a pavement inspection of your airport on 12/15/2015. Pavement inspections are performed every three years. These inspections give the Office of Aviation a definitive picture of the airport pavement conditions and the maintenance necessary to preserve them. The Pavement Condition Index (PCI) values generated from Micro Paver software are used to select State and Federal grant projects.

Pavement inspector: Andrew Doll

Current conditions and maintenance suggestions:

Runways

RWY 10-28 A: Pavement needs are being corrected with State grant in 2016.

Taxiway

T/W A: Rehabilitate

T/W B1: Pavement is raveling and needs sealed or rehabilitated. Some of the transverse cracks will require full depth repaired.

T/W B2: Crack seal and seal coat. The large depression may require full depth repair, monitor and address deficiencies.

T/W C: Will need more crack sealing and seal coat. No taxiway markings at all.

T/W C

T/W D: Rehabilitate or reconstruction.

T/W D

T/W E: Crack seal

Apron

AP A: Half of the apron has been crack sealed. Complete crack seal on entire apron.

AP B: Continue crack sealing as needed.

AP C1: Continue crack sealing as needed and seal coat.

AP C1

AP C2 & D: No preventative maintenance has been done on this pavement. Crack seal and seal coat.

AP E: Remove pavement when rehabilitating taxiway D.

AP F: Good job on preventative maintenance but the pavement needs reconstructed.

AP G: No joints cut in pavement.

AP H: Joint seal.

AP I-1: Crack seal and seal coat.

AP I-2: Large gap next too concrete apron that needs sealed. Crack seal and seal coat remaining pavement or rehabilitate.

AP I-2

AP K: Seal coat

T/Hangar

T/H A: Crack seal as needed.

T/H B: Crack seal and seal coat.

T/H C: Crack seal and seal coat. On the center line of pavement there is a crack that needs repaired. Slotted drain might be a good solution.

T/H D: Crack seal, seal coat or rehabilitate. Some areas need full depth repair.

T/H E: Reconstruct.

T/H E

T/H F: Seal coat pavement is starting to ravel.

T/H G: Seal coat and crack seal as needed.

T/H G

T/H H: Crack seal

General Remarks:

Preventative maintenance can extend the life of your pavement up to 5 years if done on a yearly basis. The lack of pavement maintenance costs the airport, state and FAA more to maintain in the long run by shorting the life of the pavement. Please continue your pavement maintenance plan.

If you have questions on your PCI inspection call Andy Doll at (614) 387-2355 or me at (614) 387-2358.

Your pavement information can be found on our web site (www.dot.state.oh.us/aviation) under Airport pavement information.
